Other Long-term Liabilities

We will now evaluate the other long term liabilities that a company has and understand them in greater detail. Let us understand them:

Long term provisions/CFO	3.2%	4.1%	4.8%	5.2%	4.1%	4.2%
How much liability is being created and repaid each year. Check past trends						
Other Long Term Liabilities						
Float like items w.r.t. Revenue	0.0	0.0	0.0	0.0	0.0	0.0
Non-interest bearing debt like items w.r.t revenue	0	0	0	0	0	0
When is payment due?						
Resources to make payment?						
Non categorised liabilities (Non categorised non current liabilities/ Total assets)	0	0	0	0	0	0
Other Operating Liabilities/ Total Assets	0	0	0	0	0	0

Float-like items w.r.t. Revenue

The first item to look is how large are float-like items. This gives the percentage of float with respect to that of the revenue. This number is thus Float divided by Revenue. The number explains about the long-term float of the company. We should also understand how large are these as compared to total assets of the company.

Long term provisions/CFO	3.2%	4.1%	4.8%	5.2%	4.1%	4.2%
How much liability is being created and repaid each year. Check past trends
