

We then need to know whether the company has adequate resources for the payment. We need to understand if the company has adequate resources to meet its obligations.

These questions tell us the size of other long-term liabilities and whether the company is in a position to repay them. This will give us a good understanding of other long term liabilities.

Non-categorized liabilities/ Total Assets

Any long term liability that we have not analyzed and understood can be classified as Non-categorized liabilities. We need to understand how big are they as a percentage of total assets. If this number is low, we need not be concerned about it. However, suppose this number is relatively higher, i.e. 3-4 percent of the Total assets of a company. In that case, we need to dig deeper and understand why exactly that is the case and what are the liabilities falling under uncategorized section.

How much liability is being created and repaid each year. Check past trends						
Other Long Term Liabilities						
Float like items w.r.t. Revenue	0.0	0.0	0.0	0.0	0.0	0.0
Non-interest bearing debt like items w.r.t revenue	0	0	0	0	0	0
When is payment due?						
Resources to make payment?						
Non categorised liabilities (Non categorised non current liabilities/ Total assets)	0	0	0	0	0	0
Other Operating Liabilities/ Total Assets	0	0	0	0	0	0
