

If we break-down the ROE, we can clearly see the margins, asset turnovers, and leverage that the company is generating. We can see that this detailed breakdown helps us understand the nature of the business much better.

Tax expense						
Current tax					384	400
Deferred tax/ (credit)					-36	-4
MAT credit entitlement						
Total Tax Expense	0	0	0	0	348	396
Profits from JV and Associates					3	4
Non-controlling interests					6	-5
Exceptional Items					55	4
PAT	0	0	0	0	1114	1131

Equity						
Shareholder's Capital	51	51	51	51	51	51
Reserves and Surplus	2587	3420	3523	4097	4405	5542
Items of OCI						
Minority Interest	43	127	175	207	216	240
Total equity	2681	3598	3749	4355	4672	5833

We see that the company is generating a high return on equity with a good margin profile. The margin has been steadily increasing, and the asset turnover has been uniform. However, it decreased significantly in the last year due to the acquisition. This way we can simultaneously compare margin profiles and see efficiency for the company.
