

Margins need to be compared over time to understand whether they have increased or decreased. Second, we need to compare the margins with that of the competitors. Third, we will check the Dupont analysis by analyzing margins over asset turnover. We will understand for different competitors about their margins as well asset turnover.

4. Growth Rates Analysis

Next, let us understand the year on year growth rates at different levels for the company.

Margins and Growth Rates						
PAT margins	14%	14%	15%	13%	15%	16%
EBIT margins	19%	19%	20%	17%	19%	20%
Gross Profit margins	55%	56%	54%	49%	53%	54%
EBITDA profit margins						
EBIT growth rates	6.57%	6.58%	1.38%	13.54%	5.34%	
EPS growth rates	7.16%	12.94%	-3.91%	20.71%	1.23%	
PAT growth rates	6.94%	11.68%	-3.53%	20.16%	1.52%	
Revenue growth rates	6%	3%	14%	3%	0%	
OCI/Total comprehensive income	-0.000236086	-0.002527046	-0.001604401	0.002977854	0.003166453	-0.009691756

We can see that the EPS growth rate as well as PAT growth rates are same which means that the company has not issued or brought back any shares. We see that the PAT growth rate has been quite healthy other than FY21 which has COVID affected and also the company made a large acquisitions in the same year.

P.A.T. Growth Rate
