

AN EXAMPLE

As we know, Reliance has three main businesses among multiple businesses:

Now, the parent company, Reliance Industries Ltd., only deals with the Petroleum business. It doesn't include Jio or the retail business by itself. For a standalone statement, only the numbers from the petroleum business will be calculated.

However, for the consolidated financial statement, we shall consider the profits, losses, and assets for subsidiaries of Reliance industries Ltd. like Jio platforms Ltd. and Reliance retail. The numbers of these subsidiaries will be included in the consolidated financials but not in the standalone one.
