Employee Stock Options

The information with regard to the Employee Stock Options are set out under Annexure to Directors' Report.

We see in Director's report, the company does not undertake commodity hedging activities but does that only in foreign exchange. The company hedges foreign currency risk only according to the company's policies. This should help us understand how the company manages risk and go about hedging activities.

How effective is the hedging?

As we can see, the company is not pursuing any active hedging on raw materials. They hedge foreign exchange. We need to evaluate if the company has major losses/write-offs over the years due to foreign exchange. If not, we can consider hedging to be effective.

Also, the company has chosen to not hedge raw materials. We need to understand if company has had significant losses from the same.

How effective is hedging?
