

As analysts, we want the company to have as less transactions as possible with Related Parties. This is because it gives the management a chance to benefit at the cost of shareholders or other stakeholders.

Most of the company's transactions should be with independent third parties, ones that are not related to them. However, very few companies will have no Related Party Transactions. Having related party transactions is not negative but having a related party as key supplier or customer should require further analysis.

The questions that need to be asked are-

Check and list all large amount items w.r.t company's PAT

The company's profit in FY21 was 1130 Crore rupees.
