

Track CAPEX in segments. Which segments is the company putting the most money in?

We can do this by evaluating segment assets or by the commentary of the management. Are you on the same page as the company, or do you differ in your opinion? This company invests more and more in Industrial Products. This helps us understand the segments where the company expects most growth.

Tracking CAPEX means tracking where the company invests most of its money and where it sees most of its future growth. Are you on the same page as the company? The best proof of the right decision by the company is increased revenue and profitability in that segment.
