

We can include advances to vendors in reverse float-like items. Here we can also click left and add comments about which items have been included for easier analysis later. Take notes in different cells in the excel.

5	PARTICULARS	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021
19							
20	Accounts Payable					621	1007
21	Advance from Customers					41	28
22	Accrued Expenses					393	527
23	Other float like other current liabilities					124	134
24	Non- interest bearing debt like other current liabilities					231	460
25	Bad Debts Written Off					4	7
26	Provision for Bad debt					78	89
27							
28	Reverse Float like items (Short term loans and advances)					148	148
29	One time recoverables (Short term loans and advances)					138	150

Let's add Rs. 63 Cr for 2021 and Rs. 70 Cr for 2020 in the reverse float like items which makes the total of reverse float like items to Rs.148 Cr for both the years.

Thus, this way, we can add up the reverse float-like items. The remaining operating items in current loans and advances that are not float-like, we need to include them in one-time recoverable in the excel sheet.

We will now add balance with government authorities and export benefits available to the one-time recoverable because they do not meet the reverse float characteristics. However, if these balances permanently stay with the authorities, then they might be included in Reverse-float like item. We should understand of the true nature of such assets. With the one-time recoverable (short-term loans and advances) becomes Rs. 150 Cr in 2021 and Rs. 138 Cr in 2020.

5	PARTICULARS	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021
19							
20	Accounts Payable					621	1007
21	Advance from Customers					41	28
22	Accrued Expenses					393	527
23	Other float like other current liabilities					124	134
24	Non- interest bearing debt like other current liabilities					231	460
25	Bad Debts Written Off					4	7
26	Provision for Bad debt					78	89
27							
28	Reverse Float like items (Short term loans and advances)					148	148
29	One time recoverables (Short term loans and advances)					138	150

With this, we have added all the data from other current assets and other financial assets. So, we have calculated both one-time recoverable (short-term loans and advances) and the reverse float-like items (short-term loans and advances).
