FOUNDER

1. LOW CONFIDENCE IN FOUNDERS

If everything is working well, but the investors are not confident in the founders, the investment will not go through.

Founders are the only constant in any startup. The markets will keep changing and the business may pivot. However, the founders and the founding team remain the company's foundation. So if the investors do not have confidence in the founders or you, investment will not go through. They can have questions about your ability, leadership, personality traits, objectives, etc.
