sorry cannot invest as the
mandate of our fund
doesn't allow

2. INDUSTRY OR SPACE

The Investors may be interested in something other than the industry or the space you are working in. There is nothing wrong with the industry or space. It is just the investors are looking for investments in certain select industries and you do not happen to be one of them.

4. MANDATE

Funds have mandates; that is, these funds can only invest in certain kind of companies. For example, there can be a case when an investor cannot invest in pre-revenue companies. Simply put, if they have a mandate and they can not act outside it. Investors will not act outside that mandate, no matter how attractive your offer is. When raising from individuals and HNIs, mandate does not come in the way. That is only the case when raising from institutions.
