

Private
Equity

Generally, as you keep working and your traction grows, more Angels will start coming in, and even VCs will start showing interest. VCs will back you when you have significant traction. Once VCs kick in, they will want growth and back your growth in different ways- money, capital, expertise, hiring, and more.

VCs

As and when you keep growing, larger VCs will keep coming in, and even private equity firms might start joining in. However, very few businesses reach this stage. Also, this stage is not directly relevant to most readers of this book.
