

PITCH DECK

Before you reach out to any investor, you must create a pitch deck for your company. A pitch deck is a presentation about your company that explains to investors - what do you do, how are you different, who are your competitors, how much traction do you have, etc. Your pitch deck is usually the first impression of your company on investors. They scan through multiple pitch decks and decide to meet few of them.

So with the pitch deck, you are basically sending the first set of proposals of what exactly your business does and what market you operate in. This pitch deck helps you secure time with investors if they are interested in what you do.
