

Most people are hesitant about sharing their timelines. However, our objective is to provide you with context about our journey. As you talk with more people, you understand how things panned out in their journey.

We closed our funding rounds in Sept 2021 with **two investors**.

- We met the first investors through cold outreach in Jan 2021. They had no idea about our business at that time and were totally new to us.

- The second set of investors was already acquainted with one of our founding members. So, we had a warm introduction.

This was our journey till our first cheque.

We look to build strength to strength after this. Having understood our journey, let us meet in the second chapter. We will start with the basics - what is fundraising, what are you getting into, what can you expect
