

1. MAJOR ASSUMPTIONS

Assumption or hypothesis is a belief about how tomorrow will be and building a business around such belief. This may be right or wrong, but you are building the business around this assumption.

Let us explain this with an example:

BREAKING NEWS

24/7

In the next 10 years, virtual reality will replace entire mobile phone industry

Let's say this is your hypothesis or assumption. It may be right or maybe wrong. If an investor is convinced with this hypothesis or assumption, they will move forward and discuss it more. Different investors have different view of the world. If they do not agree to your assumptions, they will pass the opportunity.

Here are a few more examples:

- VR will change the way how we consume content.
- Electric vehicles will have 50% of sales, or one of every two cars sold will be an electric vehicle by 2030.

Your business is being built as per this hypothesis. If an investor does not agree to to this, they will pass.
