

## EXAMPLES:

Let us go through some sample pitch decks and understand some of them. You can find a lot of sample pitch decks on Internet. Go through a number of them and that will set context about how to make pitch decks. Go to - [slidebean.com/templates](https://slidebean.com/templates). Here you can find a template to pitch deck. You can find such templates at other places too. You can use these templates for the flow in pitch deck for your business too.

You can also use templates while creating pitch decks.

First, you must create a list of the things you want in your pitch deck. Create a list of different slides that you want. The samples and templates we discuss will come really handy.

Also, remember that you do not need to share everything about your business as you do not want to overburden the investors. All you have to do is get their interest for the next meeting. You don't need to explain the entire market and product in the pitch deck itself. You just need to explain enough to get them interested in understanding more.
