

The next slide on the pitch deck is the “slide layout” which is somewhat obsolete as we do not use it anymore today. These pitch decks were developed back in 2004 when people used to check everything on PC. Now, most people use a smartphone to read pitch decks. A lot has changed since then in terms of investor behavior as well. The slide layout was useful when you had to scroll through every page one by one. Now, you can quickly scroll on the mobile phone.
