

Next, they explain the features like the user profile. Here, they are answering “How it works” for the user.

[thefacebook]

User Profile

Each thefacebook.com user maintains and updates a profile that includes:

- **Contact information**
- **Personal information:** *relationship status and procurement, political views, clubs, jobs and favourite music, books, movies and quote.*
- **Course information:** *the site has a built-in database of school courses and concentrations and automatically builds a user's class schedule.*
- **Picture**

[thefacebook]

Additionally, thefacebook.com automatically adds to each user profile links to school news articles that refer to the user, the last user-away message in the AIM system and the last user access location (the site has a built-in database of school dormitories and halls).
