

In the next slide, they explain what social networking is and what intra-school networking is. Here, they explain “How it works” for the user.

[thefacebook]

Social Networking

Intra-School Networking

Each thefacebook.com user can browse their school's social network through the following mediums:

1. **Social Net:** Displays ten random people from the user's school
2. **Course Roasters:** Displays all students enrolled in any given courses
3. **Advanced Search Engine:** Allows for search on every user profile parameter

Additionally, each user can add friendship list to their profile, pending second-source verification of friendship status. thefacebook.com automatically adds to each profile a visualization of their friendship network and an indication of the user's connection to viewers of their profile (i.e., friends, friend's friends).

During this time, the social network was relatively new. As a result, they had to explain their business model or the market from scratch.

[thefacebook]

Intra-School Networking

Each user can also browse the social network of other schools through the global search function. Each user can add a friendship list for each school in thefacebook.com network

Here again they are building on the explanation of how it works?
