

SUMMING UP...

In this chapter, we discuss what a Pitch deck is and what is expected out of it? We discussed how you can go through templates and sample pitch decks to understand them well. These will give context to better understand pitch decks.

Next, when you start working on your pitch deck, the first thing is to create the flow or list of slides you plan to cover and then enter content by making individual slides. The more pictorial they are, better it is. Once the content is ready, you can give it to a designer to design it for you.

Let us discuss in greater detail about the things to be kept in mind when creating the pitch deck.
