

01. Create Layout

First, you must create a layout of your presentation, fill in the important details and only then start designing. Do not work on the design and content together, as it might get confusing. You will lose focus, and the content may be compromised. The content is far more important than the design.

PROBLEM STATEMENT

"95% of cars in India have a life of fewer than 10 years"

- said Forbes

• 2 Statistics to demonstrate the problem

SOLUTION

• 2 stats that show how the solution is working in the market

HOW IT WORKS

02. Never Lie

You must never lie on the pitch deck just to get the initial attention. Remember, the next step is not fundraising. There will be a lot of conversation between you and the potential investor, which is enough to uncover your lie. In larger rounds due to diligence will also be involved. Also, this will personally damage your reputation. Never lie on pitch deck.
