

05. Simplicity Over Complexity

Create a pitch deck which is as simple as possible. If you complicate it with jargons and explanation that is difficult, investors may pass due to lack of understanding.

06. No Fixed Rules

You do not have to follow any rules while creating a pitch deck. You can be as creative as possible and use whatever form of communication works for you. Whatever best describes your business and gets the interested, is a good pitch deck.
