

## 07. LOOK FOR CREDIBILITY

Add whatever form of credibility you can to your pitch deck. For example:

- If you have famous brands, as your customers use their logo.
- If you have advisors or consultants, use their names and experience.
- If you have worked for other reputed companies, use past employers' references to build trust.
- You can also add any newspaper article about you or the market.
- You can even use any awards that you have won.

You can use these (or anything else) to build credibility for your business. Include anything you can to get the investors' trust. Not every business will be able to build that trust and credibility. So if you have the edge, show it in the pitch deck. However, be careful that you get permissions from individuals you are mentioning on the pitch deck.

## 08. USE REFERENCE

To explain something new to the investors, you may consider using something that the investors already know or relate to. For example you can say that you want to become a Netflix of this, Amazon of that, Spotify of this, or YouTube of that. Thus helps investors understand business very quickly
