

So whatever challenges come in the business, you and your team will have to resolve the same.

BY THE TEAM HERE, WE MEAN:

financial
benefits

the investors

the founders

the employees

everyone associated
with the business

So we learn that capital infusion is one part of the fundraising process. It is a very long journey between different entities with common goal to grow the business. So if the business succeeds, then everyone in the process benefits both financially and non-financially.

Non - financial benefits include:

non-financial
benefits

- Introductions
- Social proof
