

The numbers include:

Income Statement

You need to create a projection of the monthly sales you expect to generate. This should be a detailed breakdown on how the sales will increase and major growth drivers.

Cost Of Goods Sold

Employee Expense

It will include the type of team you are trying to build and the pay scale of these employees. You also have to enter the monthly employee expense that you are planning.

Inventory Expenses

Advertising and customer acquisition expense

Other Expense

Simply put, all the major expenses you expect for your business must be used in the financial projections.

End Surplus/ Shortfall

In the end, you must check for End Surplus or Shortfall to expect the business to have.
