

Once you have an exhaustive list of all the expenses, you should create multiple sheets. Each relating to major expense as per the projections.

	A	B	C	D	E	F	G	H	I
1									
2		M1	M2	M3	M4	M5	M6	M7	M8
3									
4	Digital Marketing								
5	Lead	100	100	100	100	100	100	100	100
6	Junior Content Creator	30	30	30	30	30	30	60	60
7									
8									
9									
10									
11									
12	Tech								
13	Senior Developer								
14	Junior Developer								
15	React Native Developer								
16									
17									
18									
19									
20									
21									
22									
23									
24									
25									
26									
27									
28									
29									
30									

You make the columns according to the months mentioned in the previous sheet.

Sheet 2 can be renamed as "Employees"

Now let us list down the employees. You need to list all employees needed and salary for each. Based on that we calculate the monthly employee cost.
