

SUMMING UP...

This is how you create the financial projection for your business:

1. Create an excel file with a master sheet containing all the numbers and KPIs.
2. Then create subsequent sheets where you explain all the numbers in detail (revenue and major cost items)
3. Always have KPI-driven assumptions.
4. Understand all your assets and how you plan on funding them
5. Know your cost thoroughly
6. Your numbers must be in line with the business
7. Allow different scenarios in your financial projection

Fill out the Excel sheet carefully and make it as detailed as possible. This will help you create a detailed financial projections that you can share with investors. Financial projections for any business, explains it really well. Make sure you can defend any number that has been added there with proper assumptions.
