

5. COMPETITION FEATURE MAPPING

To create a feature map, open an empty Excel sheet and create 2-5 columns.

The first column will include the names of all your competitors, like competitor A, competitor B, competitor C, and your company.

	Feature 1	Feature 2	Feature 3	Feature 4	
Competitor A	X	O	O	X	
Competitor B	O	O	X	X	
Competitor C	X	X	O	X	
Competitor D	O	O	O	X	
Your Company	O	O	O	O	DOES IT BEST

The next columns will be about individual features. You can include as many features as you want. You can rename the columns like Feature 1, Feature 2, Feature 3, Feature 4, etc.

Now you can score each competitor about each feature. Using this, you can compare different competitors and their offerings. You can identify strengths and your weaknesses and same for each competitor.
