

01 Growth of Cash Flow

- How big can the company become?
- How quickly can the company grow?
- The growth potential of the company's cash flows is an important factor to consider.

02 What is the additional amount of capital that is required?

Some businesses inherently require more capital than others. This capital can be in the form of debt or equity. Companies that have lower investment needs are worth more than companies that have higher investment needs.
