

Capacity Utilisation Analysis for Indian Cement Industry

Source: IBEF report on cement industry - July 2019

- Current installed capacity (approx. as in July 2019) - 500 MTPA.
- Current production - 337 MTPA.
- Capacity Utilisation - 71%

- Going ahead, production capacity is expected to increase by 15-20 MTPA each year over the next two years.
- Demand shall increase at a pace faster than that and, therefore, capacity utilisation shall go up.

Conclusion

In the cement industry, capacity utilisation can be expected to improve slightly over the medium term.
