

The major purpose of an industry size analysis:

- To identify the potential size of the opportunity and the potential growth going forward
- The industry size trend is observed over time to get hints for the future
- The industry size is broken down into smaller elements to identify growth potential.
- It is possible for industries to stay stable in volume terms but grows in value terms.
- As the growth of bigger companies is directly linked with the growth of the industry - Market size analysis becomes much more important.
- A growing industry, however, makes it easier for all players— big or small—to grow at a decent pace.

Technical Textiles Market in India:

Indian Technical Textile Market	2008	2013	2018	2021E
Total Market Size (in Rs.)	36,775 Cr	65,920 Cr	1,16,217 Cr	2,00,823 Cr
Organised Market Share	90%	-	85%	-
Unorganised Market Share	10%	-	15%	-

- It is seen that the industry is growing at a decent pace and the size of opportunity is relatively large.
- Any firm that is able to scale successfully in technical textiles can become big due to large market size. However, the firm would have to operate across sub segments.
