

7. Market Size Study

- In 2008, Sony acquired 10 years broadcast rights for ₹ 8200 crores.
- In 2018, Star India acquired 5-year universal rights i.e., for 2018–22 for ₹ 16,347 crores i.e. 2.55 billion USD, which translates to 500 million USD per year.
- Global media rights currently (\$ per year):
 - NFL (American Football USA) - 6 billion USD
 - EPL (English football) - 5 billion USD
 - NBA (basketball USA) - 2.66 billion USD
 - MLB (baseball USA) - 1.55 billion USD
 - IPL (Indian cricket) - 500 million USD
- Ad realisations have been constantly increasing for broadcasters as seen in note 6.
- Viewership is increasing with broadcast now in regional channels as well.
- Next auction is due for 2023–27. That is when the franchisees will see the next increase in profits.

8. Industry Stability

Teams like Kolkata Knight Riders, Mumbai Indians and Chennai Super Kings that have done well to attract slightly higher sponsor revenues than others. However, a major contribution comes from the central pool of revenues that is split equally among all competitor teams.

9. Disruptions Threat

Different sports are organising leagues such as Pro Kabaddi for Kabaddi, Hockey India League for Hockey, and Indian Super League or Football. These could take away some viewership from IPL. However, the viewership differential is very high. Yet, this can be a potential threat.

10. Supplier Power

Number of Suppliers	Many players
Availability of regular supply	Seasonal (only during IPL months)
Uniqueness of services	No substitute
Ability to substitute	No substitute
Switching Costs	Effort
Dependency of industry on them	High Dependency
Can the Industry threaten to vertically integrate?	No
