

Gains Required by the Customers of the Agrochemical Industry - Insecticides Segment

Required Gains

- Meet adequate requirements of the crops that farmer grows (basic crop protection).
- Environment-friendly.
- Application of product permitted by the government.
- Usage guidance provided.
- Farmer's health should not be harmed on sustained usage.

Expected Gains

- Awareness, consultancy and guidance.
- Reduced entry barriers-no special equipment should be required for application of the company's products.
- Environment-friendly for entire community.
- Focus on farmer's learning curve.
- Branded products for performance assurance.
- Community accepted product to reduce social pressure.

Unexpected Gains

- Low wastage application methods (formulations and equipments).
- Promised or more-than-expected yield.
- Ease in credit facilities. Farmers pay as per their crop production in the given year.
- Give a higher sense of security i.e reduced doubt that crops could be destroyed by pests despite usage.
