

Pains of Customers that need to be Relieved for Agrochemical Industry- Pesticides Segment

Before Use

- Lack of awareness about what product to buy.
- Inefficient selling by unorganised retailers.
- Sense of being cheated - common amongst farmers.
- Improper information by retailers to sell more.
- High application equipment costs.
- Community pressure against excessive use of pesticides.
- Uncertainty about performance of product and return on investment - a huge psychological barrier.

During Use

- Lack of knowledge about how to use the product and in what quantity.
- Improper safety equipment and high costs of safety.
- Health hazards for the farmers due to chemical exposure.
- Wastage in application reduces efficiency and increase cost.
- Uncertainty about outcomes creates psychological barriers.

After Use

- Health effects for the entire community due to long term usage of chemicals.
- Soil health of the land on which crop is being cultivated.
- Inability to pay for the costs of pesticides if the crop is destroyed or poor harvest is obtained.
