

Once the value proposition by the industry and its players has been understood:

More specifics about the industry's activities, players, risks, and demand-supply scenario needs to be looked into.

Further analysis is done to understand the industry size, stability, pricing power, disruptions, and regulations.

The profitability trends in the past for the industry is analyzed and the future direction is sensed based on Michael Porter's five forces framework.

These together form the third point of the 9-point business circuit - Broad Industry Analysis
