Apple may launch iPhone SE 4 in March

We might not have to wait for a new iPhone till September 2025. Apple is expected to drop the iPhone SE 2 in March 2024. Barclays analyst Tom O'Malley shared this. The iPhone SE 4 will be a budget offering from the Cupertino-based tech giant and will target those who don't really

wish to go for the premium iPhone series. Ahead of the launch, rumours have already painted a picture for us, let's see what all we know so far. Apple is expected to pack the upcoming iPhone SE 4 with some major upgrades, compared to the previous generation which was released in 2022. It can closely resemble the iPhone 14 in look and feel. The iPhone SE 4 can feature a 6.1-inch OLED display with a notch for Face ID and a front camera. The iPhone SE 4 can pack a 3,279mAh battery, up from 2,018mAh, and a USB-C port for faster charging.

Oppo Find X8 series with MediaTek Dimensity 9400 chip launched

Oppo has brought its famous and latest Find X series smartphones. I am talking about the Oppo Find X8 series, which includes two smartphones – the Find X8 and the Find X8 Pro. The Find X smartphones are usually camera-oriented and the same goes for the latest ones as well. Both smartphones are said to feature great camera capabilities and performance with 50-megapixel main cameras and MediaTek Dimensity 9400 processor. Both smartphones come in different sizes but same displays. The Find X8 features a 6.59-inch screen while the Pro model has a 6.78-inch panel.
