

Dell Latitude 7455

A Compact Qualcomm Workhorse

Manish Rajesh | manish@digit.in

The Dell Latitude 7455 is making waves with Qualcomm's latest processors designed to supercharge productivity for professionals on the move. This 14-inch laptop offers two impressive configurations: the Snapdragon X Elite X1E-80-100, boasting eight performance cores and four efficiency cores, and the budget-friendly Snapdragon X Plus X1P-64-100, which features two fewer performance cores. Both configurations feature an NPU chip, elevating AI performance for demanding tasks.

Build and Design

From a design perspective, the Latitude 7455 adheres to Dell's classic business look. Its aluminium chassis is sturdy and feels premium, although the lid's requirement for two hands to open is a

bit of an inconvenience. The laptop features thin bezels framing a vibrant display, while the 1080p IR webcam with a privacy shutter sits conveniently above the screen. A smart lid design also elevates the base when opened past 90 degrees, enhancing airflow through the single heat pipe cooling system.

The backlit keyboard offers spacious keycaps with good travel and feedback. A dedicated Copilot key provides quick access to Microsoft's AI features, while the power button doubles as a fingerprint reader.

The Latitude 7455 features a four-speaker audio system and connectivity is also robust, with Wi-Fi 7 and Bluetooth 5.4 support.

Coming to the ports, on the left you'll find two 40 Gbps USB4 ports with DisplayPort 2.1 and Power Delivery, along with a MicroSD card slot. The right side houses an audio combo jack and a 5 Gbps USB Type-A 3.2 (Gen. 1) port.

Display Quality

While there's only one display option, it's a noteworthy one. The WQXGA (2560 x 1600) IPS touchscreen promises stunning visuals and sharp details, making it great for both work and entertainment.

During our testing, we got a peak average brightness of 460 nits, which is great. Colour accuracy is also great; we tested 94.2 percent sRGB and 70.8 percent DCI-P3 colour gamut coverage.

Performance

In terms of performance, we've got the top-end Snapdragon X Elite X1E-80-100 CPU, hitting 4.00 GHz on performance cores and 3.40 GHz on
