

23 years of tech brilliance: Zero1 Awards lead the charge into the future

As the calendar flips to 2025, it's time to pause and gear up for the exhilarating tech-filled journey ahead. At Digit, the New Year also marks a poignant moment of change, excitement, and ambition. After 14 years of association, Soham Raninga - Editor-in-chief of the Digit Magazine has passed the baton in search of newer adventures.

While we bid a fond farewell to Soham who shaped Digit into what it is today, the team stands energised, determined, and ready to step into a new chapter. Big plans, positive vibes, and unshakable energy—we're charging into 2025 with an exciting vision. The beginning of the year usually is a time of resolutions and dreams. For us at Digit, it's a chance to reaffirm our commitment to you, our readers, and to the tech world we love so much. The bar is set high, and we're ready to raise it even further.

24 years of celebrating excellence

There couldn't have been a better way to start the new year than Digit's iconic Zero1 Awards? For 23 glorious years, these awards have been the gold standard for recognising the best gadgets of the year. They honour the champions in more than 30 categories after our experts put them through intensive testing. From blazing-fast smartphones to revolutionary laptops and groundbreaking wearables, the Zero1 Awards celebrate innovation that makes a difference. This year, we will be rewarding gadgets in three different categories - Zero1 — which stands for absolute best product in its category, Best Buy — which rewards the best value product in the segment and Popular choice - that is loved by you, the actual users. Each product that earns a Zero1 Award has been meticulously tested to ensure it stands out not just as the best, but as a benchmark for the industry.

AI, gadgets, and trends shaping 2025

If 2024 taught us anything, it's that AI isn't just the future—it's here and now. Generative AI tools had

“Each product that earns a Zero1 Award has been meticulously tested to ensure it stands out not just as the best, but as a benchmark for the industry.”

already become quite popular but Artificial Intelligence made it to nearly every gadget we used over the past 12 months. It is reshaping every facet of our lives. In 2025, we're optimistic about seeing AI merge with consumer gadgets in ways we've only dreamed of. The possibilities are endless, and the promise of such innovation is exhilarating. Beyond personal tech, AI's integration into homes, workplaces, and industries opens doors to smarter living and working environments. It's an exciting time to be a tech enthusiast (but, when has it not been) — here's to a year of delightful surprises, ingenious solutions, and, of course, gadgets that make us go, “Wow!”

Guarding against the dark side

While technology dazzles, it's impossible to ignore the rising tide of digital scams. 2024 was quite strange that way. There were more conversations than before around cybersecurity, rising scams and related topics. Yet, the fraudsters found new ways to get into people's minds. Digital Arrest - a new type of scam was on a rise — and it targeted people across age groups. At Digit, we pledge to not only celebrate innovation but also educate our readers on navigating the digital world safely. Let's tackle these challenges together, one safe click at a time!

Looking ahead

The first edition of Digit Magazine for 2025 is not just reflecting on the past year but also about paving the way for a brighter future. With big plans in the pipeline, and an unwavering commitment to delivering the best tech content, Digit is set to soar higher. From bringing you the latest scoops on groundbreaking innovations to helping you make the best buying decisions, we are here to ensure that 2025 is your best tech year yet.

Here's to a year of breaking barriers, embracing innovation, and, most importantly, connecting with our wonderful readers. After all, what's technology without the humans who shape, use, and love it? Welcome to 2025. Let's make it legendary! **d**
