

Samsung Galaxy S22 Ultra users complain about boot loop issues

Samsung Galaxy S22 Ultra users are reportedly facing issues after they have updated the device to the latest OneUI 6.1 update. The S22 Ultra, which was released three years ago, is still regarded as a respectable phone with a promising camera and hardware. Nonetheless, some users are yet again com-

plaining about the boot loop problem on social media sites. While the boot loop is the most serious issue, users have also reported random crashes, freezes, and jittery performance. Most of the users highlighted that they have started facing problems soon after they updated to the latest OneUI update. <https://bit.ly/4j2yIv0>

ASUS announces NUC 14 Pro, its first AI mini PC

ASUS has officially introduced the NUC 14 Pro AI, a mini-PC that is specifically designed to help businesses, entertainment, and industrial applications. The new ASUS mini-PC comes powered by the Intel Core Ultra processors (Series 2) and is equipped with Microsoft Copilot+. Additionally, the device is touted as the world's first AI-enabled mini PC, combining advanced AI capabilities, and compact design. The ASUS NUC 14 Pro AI is equipped with a variety of processor options. <https://bit.ly/4aciypF>
