

Premium Phone

The cream of the crop

India is a market where affordability has traditionally dominated, premium smartphones, priced above ₹50,000, are carving their niche among tech-savvy and aspirational consumers. These devices epitomise luxury, offering cutting-edge SoCs, stunning LTPO OLED displays with adaptive refresh rates, and versatile camera systems that rival professional gear. Features like periscope zoom, LTPO displays, and pro-grade video recording, once limited to the ultra-elite category, are becoming staples. The winner in this segment smashes all the competition when it comes to raw performance, and that's what the Digit Zero1 Awards are all about. Let's dive in to uncover which flagship phone redefines excellence this year.

Winner: iQOO 12

The iQOO 12 is a game-changer in the 2024 flagship landscape, proving that raw performance doesn't need a sky-high price tag. In our benchmarks, it outperformed pricier competitors like the Samsung Galaxy S24 Ultra and iPhone 16 Pro Max, handling everything from demanding games to multitasking with unmatched speed and efficiency. This isn't just a phone for gamers; it's a powerhouse for anyone seeking lightning-fast performance. What's surprising, and delightful, is how iQOO has turned its focus to areas beyond gaming. The cameras, traditionally a weak point for gaming-centric devices, now rival flagship heavyweights. With vibrant colour reproduction, excellent detail, and solid low-light performance, the iQOO 12's photography capabilities no longer feel like an afterthought. The iQOO 12 doesn't just compete with the best; it challenges what we expect from premium smartphones. It's the best-performing phone we've tested this year, hands down.

Vivo X100 Pro
Price: ₹89,999

iQOO 12
Price: ₹52,999

Runner-Up and Best Buy: Vivo X100 Pro

The Vivo X100 Pro is an impressive runner-up in the race for the best-performing phone of 2024. It delivers performance that comes tantalizingly close to the iQOO 12, which boasts the Snapdragon 8 Gen 3. Day-to-day tasks, high-end gaming, and multitasking feel effortless, with the X100 Pro rarely breaking a sweat. While the iQOO 12 edges it out on pure raw power, the Vivo X100 Pro brings more to the table in other key areas. Where this phone truly shines is its camera system, which competes with the best in the market. The telephoto and portrait capabilities are standout features, producing DSLR-level images with stunning clarity, natural depth, and vibrant colours. At ₹90,000, the Vivo X100 Pro is an incredible value-for-money flagship, making it our pick for the Best Buy Award in this category. It strikes a near-perfect balance between performance and photography, delivering an experience that few phones can match at this price point. For anyone seeking flagship-grade power with market-leading cameras, the Vivo X100 Pro is a compelling choice.

2nd Runner-Up: iPhone 16 Pro Max

The iPhone 16 Pro Max earns its spot as the 2nd runner-up in the 2024 performance race, thanks to its formidable A18 Pro chipset. Apple's silicon continues to lead in efficiency and stability, delivering blazing-fast performance for demanding tasks. The iPhone's hallmark software optimization shines here, with iOS 18 offering a buttery-smooth, intuitive experience that complements the hardware perfectly. The camera system is equally reliable, producing detailed photos and exceptional videos. The iPhone 16 Pro Max captures crisp, stable footage even in challenging conditions. With top-tier performance and consistent camera results, it remains a favourite for power users and creators.

iPhone 16 Pro Max
Price: ₹1,44,900
