

The evolution of smartphone displays has become a defining battleground in mobile technology. The smartphone industry has seen a significant shift toward LTPO AMOLED panels that offer dynamic refresh rates, balancing performance with power efficiency. The Digit Zero1 Awards Best Display Smartphone category recognizes devices that excel in display technology, acknowledging that screens are no longer just viewing panels but essential interfaces that shape our daily digital interactions.

Winner: Google Pixel 9 Pro XL

The Google Pixel 9 Pro XL is the Zero1 Award winner in the display segment. Google's flagship phone features a remarkable 6.8-inch Super Actua OLED display that sets new standards for mobile viewing excellence. The Pixel 9 Pro XL's display boasts an impressive peak brightness, ensuring exceptional visibility even under direct sunlight. Its QHD+ resolution delivers razor-sharp text and imagery, while HDR10+ support enhances the visual experience with rich, accurate colours and deep contrasts. A 120Hz refresh rate ensures seamless scrolling and fluid animations, making every interaction feel responsive and natural. Google has maximized screen real estate with uniform, slim bezels that contribute to an immersive viewing experience. The display's colour accuracy and vibrancy rival—and often surpass—its competitors, making it ideal for everything from casual browsing to professional content creation. This achievement cements its position as the ultimate display smartphone of the year.

Pixels That Make Your Eyes Pop

Google Pixel 9 Pro XL
Price: ₹1,24,999

Realme GT 6
Price: ₹41,999

Runner-Up: Apple iPhone 16 Pro Max

The iPhone 16 Pro Max is the runner-up in the Digit Zero1 Awards for Best Display Smartphones, thanks to its expansive 6.9-inch Super Retina XDR OLED display, which continues to set a high standard. It delivers exceptional visibility, whether indoors or under direct sunlight, with Apple's refined OLED technology achieving deep blacks, brilliant highlights, and near-perfect colour accuracy. Its standout features include the ProMotion 120Hz refresh rate and a remarkably high peak brightness. This year, Apple has further minimized bezels, creating an immersive edge-to-edge viewing experience that is truly captivating. The iPhone 16 Pro Max reaffirms why Apple's displays are celebrated year after year, offering a premium visual experience that caters to gamers, movie enthusiasts, and professionals alike.

Apple iPhone 16 Pro Max
Price: ₹1,44,900

Best Buy: Realme GT 6

The Realme GT 6's display is a clear standout and one of the primary reasons it has earned our Best Buy Award in the Best Display Smartphone category. It features a 6.78-inch curved AMOLED panel with an FHD+ resolution, delivering vibrant visuals and a premium look. Supporting a 120Hz refresh rate with LTPO technology, the display adapts seamlessly to different tasks, balancing fluidity and battery efficiency. Outdoor visibility is excellent, even under harsh sunlight, and the display boasts near-flawless colour accuracy, excelling in precise and natural visuals. Day-to-day usage is equally impressive, with sharp, crisp visuals and customizable colour profiles to suit individual preferences. Whether gaming, streaming, or casual browsing, the Realme GT 6 offers a smooth, immersive experience. Simply put, this display is not just a feature—it's a statement of excellence, setting new standards for what users can expect in this segment.
