

The Gaming Laptop (151K – 250K) category is all about delivering serious performance without venturing into ultra-premium territory. In India, this sweet spot has exploded in popularity thanks to a rapidly growing gaming community and constant leaps in tech.

With both competitive and casual gamers on the rise, brands are packing these machines with high-end GPUs like the NVIDIA RTX series and the latest Intel or AMD processors, ensuring they can handle the newest games and heavy-duty tasks without breaking a sweat.

But it's not just about raw power. These laptops also prioritize value, boasting high-refresh-rate screens, robust cooling systems, and eye-catching RGB features to let gamers personalize their rigs. By spotlighting this category in our awards, we're recognizing its massive growth and the standout models that deliver where it counts, performance, design, and overall bang for your buck.

Winner and Best Buy:

Lenovo Legion Pro 5i

The Lenovo Legion Pro 5i, especially in its top-spec variant

Gaming Laptop (151K - 250K)

Strictly high-end

Lenovo Legion Pro 5i

Price: ₹2,01,990

rocking an Intel Core i9-14900HX and an NVIDIA RTX 4070, claims the Digit Zero 1 Award for perfectly blending power, performance, and portability. Engineered for high-end gaming and demanding professional tasks, it clearly separates itself from the pack.

Its Intel Core i9 processor and RTX 4070 GPU handle modern games at top settings without breaking a sweat, while advanced cooling ensures zero performance dips. Paired with 32GB of DDR5 RAM and a 1TB SSD, the Legion Pro 5i delivers the speed and storage necessary for both hardcore gamers and pros juggling heavy workloads like video editing or 3D rendering.

The attention to design is another highlight, featuring a full-size keyboard with satisfying key travel and RGB lighting, plus a high-refresh-rate display that boasts exceptional color accuracy. The end result is a laptop that defines what gaming rigs can and should be, making the Legion Pro 5i a worthy recipient of the Digit Zero 1 and the best buy Award in this category.

Runner-Up: Alienware m16 R2

The Alienware m16 R2, especially in its top-tier configuration, cements itself as a heavy hitter in the high-performance gaming laptop scene, claiming a well-earned runner-up spot in the Digit Zero 1 Awards. Built for die-hard gamers and tech enthusiasts alike, it pairs advanced hardware with a head-turning aesthetic.

Armed with Intel's latest Core processors and NVIDIA RTX 40 Series GPUs, the m16 R2 chews through demanding titles at high frame rates. A high-resolution, fast-refresh display brings every detail to life, while Alienware's robust cooling tech keeps performance steady during marathon sessions.

Alienware m16 R2
Price: ₹2,17,598

True to Alienware form, you get a solid build and customizable RGB lighting for that added flair. Multiple ports, including Thunderbolt 4 and HDMI 2.1, make it a breeze to connect external displays and peripherals.

Yes, it comes at a premium, but for those seeking raw power, sleek style, and cutting-edge tech all in one, the Alienware m16 R2 remains a top contender, and a worthy runner-up in the Digit Zero 1 Awards.
