

The evolution of television technology has been nothing short of extraordinary, and in 2024, Mini LED TVs have progressed a great deal and emerged as a very appealing option for consumers looking for premium TVs with large display sizes. Premium Mini LED TVs offer superior brightness levels and fine local dimming control that allows for high contrast. They can sustain a viewing experience that's both immersive and lifelike without any risk of burn-in.

This year, Mini LED TVs have pushed the envelope with innovations like enhanced peak brightness and refined backlight control. Here's a look at the best in the category that stood out for their stellar performance and technological advancements, claiming the coveted Digit Zero1 Awards.

Winner: Sony Bravia 9 75-inch TV

Sony has outdone itself with the Bravia 9 Mini LED TV, a masterpiece of engineering and innovation. This TV stands

Mini LED TV

Dependable excellence

**Sony Bravia 9
75-inch TV**
Price: ₹4,17,990

**Samsung 65-inch
Neo QLED 8K QN800D
Smart AI TV**
Price: ₹3,19,990

out with its XR Backlight Master Drive, which delivers unprecedented control over brightness. You get deep blacks and dazzling highlights that make scenes pop. The Cognitive Processor XR further elevates the experience by mimicking human vision and hearing, rendering colours and details with astonishing accuracy.

The performance is particularly awesome when rendering high APL HDR sequences. Gamers will appreciate the ultra-low latency and HDMI 2.1 support, ensuring smooth and responsive gameplay even in fast-paced titles. Completing the package is a sleek design featuring narrow bezels and a premium metal finish, making the Bravia 9 a stunning addition to any living room. This is certainly the best Mini LED TV we have tested.

Best Buy: Samsung 65-inch Neo QLED 8K QN800D Smart AI TV

Samsung Neo QLED 8K QN800D Smart AI TV offers an amazing experience at a competitive price. This TV offers a sharp QLED display ensuring support for a wide colour gamut and exceptional clarity. The Filmmaker mode is extremely accurate and panel uniformity is also remarkable. This one should also be appealing to gamers with features like four high-bandwidth HDMI 2.1 ports, Motion Xcelerator Turbo+, ALLM, and HGiG. This TV also offers exciting audio technologies like Object Tracking Sound Pro, which creates dynamic, 3D soundscapes.
