

Zeroing in on Excellence: Welcoming a Transformative Year For Digit

As we enter the new year, I am thrilled for the next exciting chapter for Digit – with a legacy spanning 24 remarkable years! This journey has been elevated to new heights with Times Network's acquisition of Digit, becoming the most popular Indian tech platform. As we welcome 2025, let's delve into the incredible strides we've made and the ambitious plans that will shape the future of Digit.

Digit Test Labs

In 2024, our in-house Digit Test Lab set new benchmarks by testing over 1,000 devices across categories, including smartphones, laptops, wearables, audio gear, and consumer appliances. All these devices went through rigorous scrutiny across more than 140 parameters, ensuring that our reviews remained unmatched in depth and accuracy. This year, we're taking our commitment to testing a step further with the launch of a State-of-the-Art Testing Lab in Delhi.

Equipped with the latest technology, this lab will enhance our ability to deliver even more precise and comprehensive evaluations. Our new Digit Test Lab will also have a dedicated section for testing home appliances, putting ACs, refrigerators, air purifiers, water purifiers and many more appliances through rigorous testing. With this, we'll provide you with the most authoritative product reviews and ratings in India, helping you make the most informed tech buying decisions.

The Digit Show

In 2025, Digit will take its brand legacy to new heights with the launch of the Digit Show on Times Now and ET Now.

This exciting new-age tech show will take our Digit Testing, expert reviews, and in-depth insights to a much wider audience. With the credibility of Digit and the vast reach of Times Network, the Digit Show promises to be a game-changer, offering tech enthusiasts across the nation a front-row seat to the latest in innovation, gadgets, and industry trends.

"We're planning larger-than-life gatherings that celebrate technology, innovation, and community like never before."

Rohit Chadda
President & COO,
Times Network

Shop@ Digit

In 2024, Digit facilitated purchases worth over ₹200 crores through our website and the Digit Squad community. This success has inspired us to take a bold new step: launch the Digit Shop. Unlike conventional e-commerce platforms, Digit Shop will only sell products that have passed our rigorous testing and received our seal of approval. This curated approach ensures that every purchase is backed by trust and quality, offering consumers unparalleled confidence in their choices.

SKOAR! Gaming Universe

The esports ecosystem in India is booming, and Digit is proud to be at the forefront of this wave. In 2024, we expanded the SCGC (Skoar College Gaming Championship), hosting events across 100 colleges. The next phase will scale this initiative to an ambitious 1,000 colleges across India, making it the largest platform for college-level e-sports in the country. From fostering competitive gaming talent to creating a thriving community of gamers, SKOAR! Gaming Universe is set to redefine the e-sports landscape in India. Visit SKOAR.gg for all game highlights.

AI Summit and Digit Tech Day

The 2024 edition of the Zero1 Awards is just the beginning. We're planning larger-than-life gatherings that celebrate technology, innovation, and community like never before. The Digit AI Summit will bring together thought leaders, innovators, and enthusiasts to explore the cutting edge of all things AI. Meanwhile, the Digit Tech Day will showcase the latest advancements in gadgets, software, and beyond, offering an immersive experience for tech enthusiasts.

Looking Ahead

Digit is poised to redefine what it means to be a technology navigator through 2025 and beyond. Thank you for being part of this journey – together, we'll make it unforgettable. **d**
