

THE ULTIMATE SMARTPHONE DISPLAY SHOWDOWN

S24 Ultra vs OnePlus 12 vs iQOO 13 vs
Pixel 9 Pro XL vs Others

Siddharth Chauhan | siddharth@digit.in

In an era where our smartphones serve as windows to the digital world, display quality has become paramount in the decision-making process for potential buyers. We conducted an extensive, scientific analysis of six leading flagship phones to determine which device truly offers the superior visual experience.

Our testing lineup included the latest premium offerings: the Realme

GT 6, OnePlus 12, Honor Magic6 Pro, Pixel 9 Pro XL, Galaxy S24 Ultra, and iQOO 13. Using professional-grade equipment – the Calman Ultimate software and Spectral C6 HDR2000 Colorimeter – we performed comprehensive measurements to cut through marketing hype and deliver concrete data.

The Science Behind the Screen

Our testing methodology focused on

four crucial aspects of display performance. First, we measured brightness levels, examining not just peak brightness but also consistency and outdoor visibility. Color accuracy was assessed using Delta E values (ΔE), where we tested 47 different color samples including grey shades and critical memory colors like skin tones. For reference, a Delta E value below 1 represents perfect color accuracy (known as the Just Noticeable Color Difference or
