

enough for your daily commute or a long workout.

VERDICT

The Mivi SuperPods Opera ANC delivers a lot of bang for your buck.

Stylish design? Check. Long battery life? Double-check. Premium features like ANC and LDAC? Yep, they're here too. Of course, there are trade-offs – like treble clarity, ANC effectiveness, and a fingerprint-happy case – but those

are forgivable at ₹1,799 (at the time of writing). In the crowded budget TWS market, the SuperPods Opera ANC face stiff competition from the likes of the Realme Buds Air 3 and Oppo Enco Air 2 Pro. Realme's ANC is slightly better, and Oppo offers a more balanced sound profile, but Mivi fights back with features like LDAC support and insane battery life. If those matter to you, the SuperPods Opera ANC are a strong contender.
