# Apple iPhone 16e launched in India

**A**fter two long years, Apple has introduced the next-generation affordable iPhone 16e in the global market. The new-generation iPhone 16e comes with a series of upgrades including the camera, display, design and performance over the iPhone SE 3. For the first time, Apple's affordable device will support Apple Intelligence. For the unversed, the iPhone 16e is positioned below the iPhone 16 series and iPhone 15 series in the market yet offers promising features and hardware. The iPhone 16e features a 6.1-inch

OLED panel but retains a 60hz refresh rate. The device now gets an aluminum design with Face ID. Under the hood, the device comes with A18 chipset and 8GB RAM to support the Apple Intelligence features. The device comes with a dedicated Apple-design 5G chipset. The device also gets a USB-C port. The device offers a battery backup of up to 6 hours more than iPhone 11. However,

Apple has not revealed the exact battery details at the moment. The device also gets an Action Button. The device is IP68 certified. The device includes AI tools like cleanup tool, Image Playground, ChatGPT integration, writing tools and much more.

Speaking of the camera, the iPhone 16e comes with a 48MP primary shooter with 2x optical zoom.

## Google Pixel 9a leaks surface ahead of imminent launch

**G**oogle is expected to expand its Pixel lineup with the launch of the Pixel 9a, a more affordable option compared to the Pixel 9 series. While Google has not officially announced the smartphone yet, leaks suggest it could launch in March 2025. The Pixel 9a is expected to feature Google's Tensor G4 processor. The Pixel 9a is rumoured to sport a 48MP primary camera along with a 13MP ultra-wide sensor. This phone will likely pack a 5,100mAh battery.

## Google Pixel 10 series launch is months away but all major details are already out

**G**oogle unveiled its Pixel 9 series back in August 2024, and if the company follows its timeline, then we can expect the Pixel 10 around the same time.

And turns out, the company is diligently working towards that. Rumours and leaks about the upcoming Pixel 10 series have even started to circulate on the internet. Now, the devices have also been spotted on the GSMA database. This means that the devices are indeed in the pipeline. The spotting has also revealed some details about the upcoming devices. <https://tinyurl.com/4tp72yyx>
