

OpenAI launches deep research in ChatGPT

OpenAI has introduced a new feature in ChatGPT called deep research, designed to handle complex, multi-step online

research. This advanced capability can analyse and summarise hundreds of online sources in a fraction of the time it would take a human. Deep research is OpenAI's latest AI agent that works independently to conduct thorough research based on a user's query. According to OpenAI, "It accomplishes in tens of minutes what would take a human many hours." <https://tinyurl.com/bpahn4n5>

Centre bans use of AI tools like ChatGPT and DeepSeek for official use

The finance ministry has issued an internal advisory that restricts the government employees to use AI tools like ChatGPT and DeepSeek for

official purposes. The decision comes as part of the government's effort to safeguard confidential data and sensitive documents from potential risks posed by these tools.

"It has been determined that AI tools and AI apps (such as ChatGPT, DeepSeek etc.) in the office computers and devices pose risks for confidentiality of (government) data and documents," said the advisory. <https://tinyurl.com/34vyetpu>

Snapdragon bets big on AI PCs

Exclusive conversation with Qualcomm India President Savi Soin

—By **Manas Tiwari**

While Qualcomm Technologies remains to be a key player, not just in mobile chipsets but across industries ranging from automotive to AI-driven personal computing, the company is more bullish on the Indian market than ever before. At the heart of this transformation is the Snapdragon X Platform, Qualcomm Technologies' premium AI-driven computing experience, which makes AI PCs affordable and accessible. Savi Soin, Senior Vice President & President, Qualcomm India, reflected on the company's journey over the last year and its vision for 2025. "Last year was amazing for us. We wanted to bring Snapdragon's premium experience across multiple industries—from 5G-connected homes to AI PCs, smartphones, and even smart clusters in two-wheelers. A major focus was also on Snapdragon India, developing products and solutions tailored to the Indian consumer and industry," he said.

A new era for computing

A major component of Qualcomm Technologies' is the AI PC revolution, which

saw significant traction in 2024. AI PCs are designed to integrate on-device artificial intelligence seamlessly. While Qualcomm Technologies had introduced its Snapdragon X Elite Platform last year, it has now announced the Snapdragon X chipset which will be first used in India on the new Asus Zenbook AI4 and Vivobook 16.

The new Arm-based chip features Oryon CPU cores, similar to those in

sleek, power-efficient devices that deliver intelligent features like real-time noise cancellation and contextual AI-driven personalisation," Mr. Soin explained.

Other highlights of the new platform are extended battery life, Bluetooth 5.4 support, and compatibility with Wi-Fi 7.

Qualcomm Technologies has worked closely with laptop manufacturers to ensure that AI PCs cater to the Indian market. The company is aiming to make AI-powered computing more accessible targeting the sub-\$600 segment. "Why would anyone buy a regular PC when they can have an AI PC that enhances productivity, connectivity, and personalisation?" he asked.

higher-end Snapdragon X-Series processors. It has a Neural Processing unit (NPU) with 45 TOPS (trillion operations per second) capability. This enables on-device AI processing and supports Microsoft's Copilot+ PC Platform.

"India is a mobile-first country, and AI PCs are bringing mobile-like experiences to laptops. Traditional PCs are often seen as bulky and outdated, but with Snapdragon-powered AI PCs, we're introducing

AI and the India Opportunity

Qualcomm Technologies' commitment to India extends beyond devices. It also includes a strong focus on government partnerships and local innovation. "We are actively participating in India's semiconductor and AI missions. We are working closely with the government to explore opportunities in design and innovation within the country," Mr. Soin noted.
