

challenges in low-light conditions and may produce oversaturated portraits. Considering its budget-friendly price point, the camera capabilities are reasonable, but users seeking balanced colour reproduction may need to explore higher-tier options.

BATTERY & CHARGING

The Redmi 14C 5G is equipped with a 5,160mAh battery, which is a standard offering in this price range. In my testing, the phone took approximately 105 minutes to charge from 0% to 100%, which is slightly slower than the average for modern smartphones in this segment. While not the fastest, the charging time is still acceptable for a budget device.

In terms of battery performance, the Redmi 14C 5G holds up well for everyday tasks. During a 15-minute session of Call of Duty: Mobile, the

battery dropped by around 5%, which is a reasonable figure considering the demands of gaming. GPS navigation for an hour consumed about 5% of the battery. Streaming Netflix for half an hour resulted in a 3% drop.

Overall, the Redmi 14C 5G's battery life is sufficient for a full day's use with moderate activities.

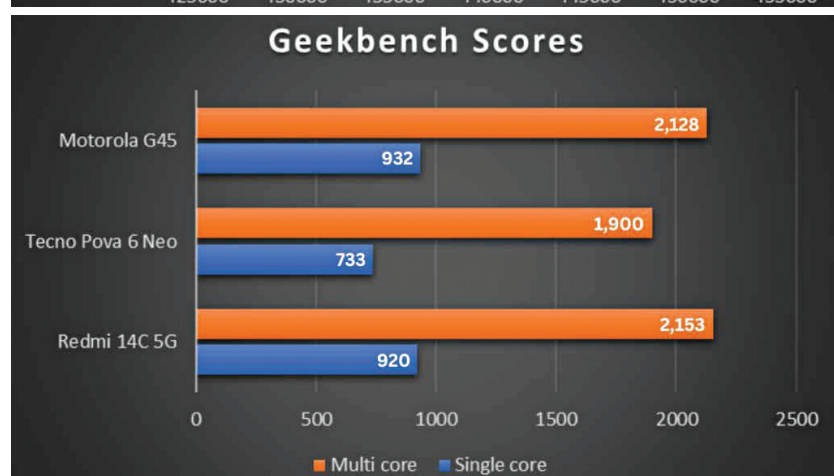

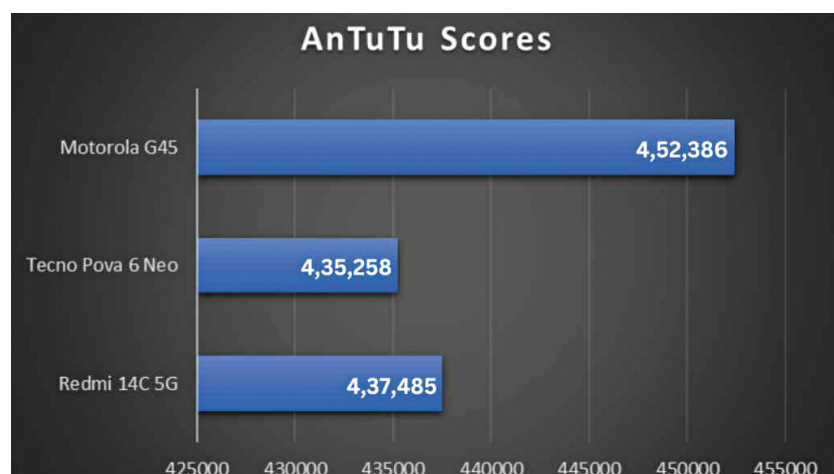

VERDICT

With its sleek design and features, the Redmi 14C 5G stands out in the under Rs 10,000 segment. The large 6.88-inch display, while not perfect, offers a decent viewing experience for everyday tasks and media consumption. The Snapdragon 4 Gen 2 chipset provides adequate performance for light multitasking and casual use, although it shows signs of lag when pushed to its limits.

The camera system performs well in well-lit conditions, capturing decent details but oversaturated portraits. For selfies, the 13MP front camera is surprisingly good, especially for a phone in this price range. The 5,160mAh battery ensures the phone can last a full day with moderate use.

Overall, the Redmi 14C 5G offers a well-rounded package for users seeking value without breaking the bank. While it has its limitations, particularly in display brightness and camera performance, it strikes a good balance between affordability and functionality. If you're looking for a budget-friendly 5G phone under Rs 10,000 and a stylish design, the Redmi 14C 5G is definitely worth considering.
