Apple ordered to open up its ecosystem by EU

Apple is once again in trouble, as the European Commission has ordered the iPhone maker to open its closed ecosystem to rival companies in order to comply with the EU's Digital Markets Act. The regulatory body hopes that this will reduce big tech's dominance. According to the decision, Apple must grant competing smartphone, headphone, and virtual reality device manufacturers access to its technology and mobile operating system, ensuring seamless connectivity with iPhones and iPads. According to the report by Reuters,

Apple will now have to follow a more structured process and timeline to address interoperability requests from app developers. The move follows a six-month investigation by EU regulators to ensure Apple complies with DMA guidelines.

On the other hand, Apple criticised the directive stating that it will hamper innovation and will give an unfair benefit to the competitors. "Today's decisions wrap us in red tape, slowing down Apple's ability to innovate for users in Europe and forcing us to give away our new features for free," Apple said in a statement as quoted by Reuters. In response, EU antitrust chief Teresa Ribera clarified that the decision aims to implement existing laws and provide regulatory clarity for both Apple and developers.

Samsung Galaxy S25 Edge price leaked ahead of launch

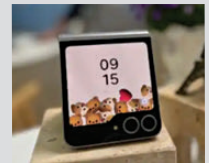

At its annual Galaxy Unpacked event, Samsung revealed an additional smartphone along with its traditional three S25, S25+, and S25 Ultra. I am talking about the Samsung Galaxy S25 Edge. According to the latest leak, the base variant of the Galaxy S25 Edge is expected to be priced between €1200-€1300 in Europe, which translates to approximately Rs 1,14,000 – Rs 1,23,000 in India. Meanwhile, the 512GB storage variant could be priced between €1300-€1400, bringing its estimated Indian pricing to Rs 1,23,000 – Rs 1,32,000.

Samsung Z Flip FE may debut months after Z Flip 7

The South Korean tech giant is expected to introduce its new foldable lineup with the Galaxy Z Flip 7 series in the coming months. Traditionally, Samsung unveils just two foldable devices every year- the Galaxy Z Fold and the Galaxy Z Flip. However, this year, the company is expected to add another phone to the lineup. I am talking about the highly rumoured Galaxy Z Flip FE. This is expected to be a more affordable flip phone from Samsung and can be launched sometime after the Galaxy Z Flip 7. Previous reports had revealed that Samsung was working on its in-house Exynos 2500 chipset for the Galaxy Z Flip 7.
